

Tridib Kumar Goswami

PhD Student from December,
2008

Lab. No.: B013

Tel: +91-80-22932240

E-mail: tridib@ipc.iisc.ernet.in

B.Sc.: Guahati University

M.Sc.: Guahati University

Research Interest: Bioorganometallic chemistry has been one of the most thriving areas of research in the recent time. It lies at the borderline of chemistry, biochemistry, biology and medicine. Design of organometallic compounds suitable for biological applications is a challenging area. The area of organometallic photonucleases is an unexplored area. My research interest is design of 3d metal-based nucleases containing organometallic moieties.
